Course: Economics 105

Term, Year: Spring 2010
Instructor: Foley

This questionnaire can help instructors improve the quality and effectiveness of their teaching. The college administration will also use it in faculty evaluation. Please answer thoughtfully the questions printed below. After, and only after, you have answered the questions on this page, respond briefly to the specific questions on the back of this form. This form will not be returned to the instructor until after grades have been turned in.

1. What elements of the course and instruction did you find most helpful to the accomplishment of the course's goals?

The labs helped to understand Excel which helped for tests and homework. In terms of in class, it was nice to have both powerpoint and the white board at times. Mark did not restrict himself to just powerpoint but rather used it as an effective way to put up information. However he slowed down and used the board at important points.

2. What elements of the course and instruction did you find least helpful? What changes, if any, do you suggest?

Sometimes the proofs that were done were a little over everyone's head and hard to follow.
Below is a list of questions, not all of which may be applicable to this course. Please answer those which are applicable with a single concise sentence.

This questionnaire can help instructors improve the quality and effectiveness of their teaching. The college administration will also use it in faculty evaluation. Please answer thoughtfully the questions printed below. After, and only after, you have answered the questions on this page, respond briefly to the specific questions on the back of this form. This form will not be returned to the instructor until after grades have been turned in.

1. What elements of the course and instruction did you find most helpful to the accomplishment of the course's goals?

   Teaching with powerpoint but explaining things on the board really helped me understand what formulas and ideas the notes provided.

2. What elements of the course and instruction did you find least helpful? What changes, if any, do you suggest?

   I feel like there is more focus on calculating tests and arithmetic than on the ideas and assumptions underpinning the statistical ideas we're exploring at the end of the semester. I guess econometrics would help with that, but that's my criticism of stats.

Please answer thoughtfully the questions printed below. After, and only after, you have answered the questions on this page, respond briefly to the specific questions on the back of this form. This form will not be returned to the instructor until after grades have been turned in.

1. What elements of the course and instruction did you find most helpful to the accomplishment of the course's goals? I really like the end of year project as a way to review all of the concepts learned during the year. It seems like a better way to see if we actually understand things than testing.

2. What elements of the course and instruction did you find least helpful? What changes, if any, do you suggest? Would you ever consider teaching this class on MWF? The pace of the class is obviously very quick which is not a bad thing, but it can be a bit of an information overload at times, especially for 75 minutes. I thought the modeling presentation was a bit time consuming and did not teach the material as efficiently as possible.
